

Transform the business. Trust the data. Activate AI.

MigrationIQ helps complex enterprises shape data strategy, govern critical information, assure SAP transformation, and build trusted foundations for intelligent operations.

THE EXECUTIVE PROPOSITION

One transformation agenda. Five connected disciplines.

Migration is a proven entry point - not the boundary. MigrationIQ connects strategy, assurance, governance, architecture, AI, and operational process depth.

MIGRATIONIQ POINT OF VIEW

Transformation risk concentrates in the seams between strategy, operating model, architecture, delivery, and business operations. We make those seams visible and decision-ready.

CAPABILITY DEPTH AND WAYS TO ENGAGE

From enterprise direction to operational truth.

04 ARCHITECTURE

Data Architecture, Analytics & AI Foundations

Connect SAP and non-SAP information through governed products, shared semantics, lineage, quality, and controls that analytics and AI can trust.

A USABLE FOUNDATION

05 PROCESS DEPTH

Manufacturing & Plan-to-Produce

Translate decisions into the ability to demand, plan, source, make, inspect, cost, stock, and deliver at plant level.

PLANTS THAT CAN EXECUTE

CORE OPERATING CHAIN

01 DEMAND	02 PLAN	03 SOURCE	04 MAKE	05 INSPECT	06 COST	07 STOCK	08 DELIVER
---------------------	-------------------	---------------------	-------------------	----------------------	-------------------	--------------------	----------------------

WAYS TO ENGAGE

2 WEEKS

Executive Diagnostic

Independent baseline, risk heat map, and immediate decisions.

4-6 WEEKS

Strategy & Roadmap

Future state, operating model, architecture choices, and sequenced investment.

RECOVERY

Transformation Assurance

Root-cause assessment, decision recovery, and readiness through the critical gate.

FRACTIONAL

Enterprise Data Lead

Senior direction across sponsors, business, architecture, governance, and delivery.

FOUNDER-LED

Faiq Khan - Enterprise Transformation & Data Leader

22+ years across SAP transformation, enterprise data, governance, architecture, AI readiness, and Manufacturing / Plan-to-Produce operations.
